

Your Guide to the South East Landcare Muster

9:00	Arrival & Registration			
9:15	Welcome to the South East Landcare Muster	Opening and introduction to the day.		
9:45	District Landcare Showcase	Be inspired by updates and highlights from Landcare districts across the South East.		
10:30	Shaping Landcare: Keynote Speaker	Insights from Professor Andrew Campbell on Landcare.		
11:15	Morning Tea	Refreshments provided.		
Break Out Sessions				
	Veranda Room	West Restaurant Room	Main Conference Room	East Restaurant Room
11:35 Break out Session 1	Empowering Action: Progress and Possibilities with the Landcare Enabling Program	Working Together on Traveling Stock Routes (TSR)	Lets Go Weeding & Eat Cake! Building Community with Landcare	Mapping Made Simple: Using GIS for Landcare Projects
12:15 Break out Session 2	Empowering Action: Progress and Possibilities with the Landcare Enabling Program	Catchment Care: Mulloon Institute & Water NSW	Telling Your Story: Videography for Landcare Impact	Tools for Conservation: Covram & the Restoration Hub
12:55	Lunch	Enjoy a relaxed lunch and networking opportunity.		
Break Out Sessions				
	Veranda Room	West Restaurant Room	Main Conference Room	East Restaurant Room
13:55 Break out Session 3	Local Land Services: Shared Goals, Stronger Partnerships	Catchment Care: Mulloon Institute & Water NSW	Telling Your Story: Videography for Landcare Impact	Mapping Made Simple: Using GIS for Landcare Projects
14:35 Break out Session 4	Local Land Services: Shared Goals, Stronger Partnerships	Working Together on Traveling Stock Routes (TSR)	Lets Go Weeding & Eat Cake! Building Community with Landcare	Tools for Conservation: Covram & the Restoration Hub
15:15	Wrap of the Day	Summary, key takeaways from Prof. Andrew Campbell and thank yous.		
15:50	Afternoon tea & Departure	Farewell and networking over tea.		

Choose Your Break Out Session Details & Speakers

10:30	Shaping Landcare: Insights from Prof. Andrew Campbell on Landcare.	Andrew Campbell will reflect on the last forty years of land restoration efforts in Australia, with a particular focus on community-based programs. Lessons learned from successes and failures will inform forward-looking provocations about the direction and role of the landcare movement for the 'converging insecurities' (food, water, energy & health) of the 21st century.
11:35 or 12:15	Empowering Action: Progress and Possibilities with the Landcare Enabling Program	The Landcare NSW Team shares the purpose and progress of the Landcare Enabling Program, highlighting key achievements and collaborative successes to date. It outlines the next steps in building capacity across Landcare networks and issues a call to action to strengthen partnerships, skills, and community-led outcomes.
11:35 or 14:35	Working Together on Travelling Stock Routes (TSR)	Discover how Landcare groups can play a key role in managing TSRs through new collaboration opportunities. Ben Serafin will share information about a new TSR database and mapping tools that bring together environmental, cultural, and public value data to help guide better decisions and resource allocation
11:35 or 14:35	Lets Go Weeding & Eat Cake! Building Community with Landcare	Weeding is as much a social activity as an ecological one. In this session, Dr Sonya Graham will explain what she has learnt from researching seven Landcare and Rivercare groups who have been working together to manage weeds for over three decades. This session will provide an opportunity to explore similarities and differences among the groups and their secrets to success.
11:35 or 13:55	Mapping Made Simple: Using GIS for Landcare Projects	Jen Evershed explores practical GIS skills for landcare, offering high-level guidance on creating clear, purposeful maps for reporting and funding applications. We will also investigate how to get the most out of free online spatial tools like SEED map to help with planning and telling your Landcare story more effectively.
13:35 or 14:45	Local Land Services: Shared Goals, Stronger Partnerships	South East Local Land Services and South East Landcare share many of the same goals and have enjoyed productive partnerships. South East LLS deliver a range of programs to landholders in South East NSW with the vision of vibrant communities in productive healthy landscapes. This session will highlight those priorities, along with the many opportunities for Landcare groups to get involved.
12:15 or 13:55	Catchment Care: Mulloon Institute & Water NSW	Supported by WaterNSW, the Mulloon Institute's new Water Stewardship Program is a grassroots initiative designed to empower landholders and communities across the Sydney Catchment Area to restore natural water cycles and improve water quality, water security and catchment health. This session will introduce the program's goals, funding opportunities, and collaborative community-based approach—highlighting how nature-based solutions like landscape rehydration and natural infrastructure can be demonstrated through local partnerships and a growing network of project sites
12:15 or 13:55	Telling Your Story: Videography for Landcare Impact	Explore the power of human storytelling with film to scale up the impact of significant Landcare projects. Going beyond the traditional reporting and communications methods to enhance the emotional intelligence of a project. Case study Hovell's Creek Landcare Erosion Control Project Film Screening and Conversation.
12:15 or 14:35	Tools for Conservation: Covram & the Restoration Hub	Discover the Covram rapid vegetation assessment tool with Ian Davison and learn from Peggy Eby how data can be uploaded to the Atlas of Living Australia's Restoration Hub—making your conservation work visible, shareable, and impactful.
